Election/Restrictions

Claims 1-12 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 15-32, directed to the process of making an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 08-31-2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James V. Suggs on 5/4/2007.

The application has been amended as follows:

In each of claims 17-24, change the status identifier from “(Withdrawn)” to “(Original)”.

In each of claims 15, 16 and 25-32 change the status identifier from “(Withdrawn)” to “(Currently Amended)”.

In each of claims 1, 10, 11, 12, 30, 31 and 32: line 2, replace the phrase “essentially of (based on a total...photoinitiator)” with the phrase “essentially of, based on a total...photoinitiator, ”.

The following is an examiner’s statement of reasons for allowance: It is agreed that none of the prior art of record or otherwise known to the examiner discloses or suggests a compositions consisting essentially of the recited components in the recited weight percents. The examiner has not found any motivation to omit the additional components required in the prior art compositions. The process claims have been rejoined as being of the same scope as the composition claims. The obviousness type double patenting rejection of record in the paper mailed 12-15-2005 over US Patent 6,936,197 in view of Coleman et al in view of Garrity is withdrawn. The reason is that the claims have been limited to compositions consisting essentially of the recited components, which are not considered to be obvious from Coleman et al and Garrity in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
